
Positron and Yealink Announce Interoperability

MONTREAL, August 16, 2010 – Positron Telecommunication Systems Inc., a global provider of business phone systems and Yealink Network Technology CO., Ltd., a leading designer and manufacturer of IP voice and video phones, announced today successful interoperability testing between the Positron business phone system and Yealink IP phones.

“Yealink was our vendor of choice to partner with,” explains Richard McGravie, President of Positron Telecom. “We have confidence in the Yealink solution so much so that we have fully integrated the auto phone provisioning directly into our configuration screens. The feature set and price points make our combined solution a great value to the channel.”

The Positron business phone system provides reliable and scalable phone systems that have integrated telephone ports for world-wide deployment such as 4 FXO, 12 FXO, 4 ISDN Bri, T1/E1 Pri and more. The Positron solutions are changing the way businesses communicate and increase revenue opportunities for its reselling partners through robust hardware design with the highest grade echo cancellers, simple to use Web-based configuration screens and a set of tools to simplify and reduce installation time.

“We are very pleased with the tight integration and interoperability between our award-winning products and Positron’s solutions,” said Stone Lu, VP of Yealink. “The Positron PBX solution supports our Enterprise HD IP phone as well as our video phones, which combine to create an excellent value and innovative solution for the Small and Medium Businesses.”

The Yealink SIP-T2x series enterprise HD IP phones work seamlessly with Positron. The SIP-T2x series includes SIP-T28P/SIP-T26P/SIP-T22P/SIP-T20P and comes equipped with the T1 TITAN chipset and T1 voice engine, offering high definition voice, a broad range of voice codecs, security protection for privacy and rich features such as BLF/BLA, PoE, Pnp Auto-provision.

About Yealink

Yealink is a professional designer and manufacturer of IP phones and video phones for the world-wide broadband telephony market. Yealink products are fully compatible with the SIP industry standard, and have broad interoperability with the major IP-PBX, softswitch and IMS on the market today. www.yealink.com

About Positron Telecommunication Systems Inc.

Positron Telecommunication Systems creates, develops and markets sophisticated VoIP equipment for enterprise communication and collaboration through communication service providers. The company’s products integrate VoIP and traditional telephony in standalone systems that combine ease of use with powerful functionality. Its VoIP devices connect analog devices (telephone, fax and modem) to an IP-Network and gateways, connect PSTN users to an IP Network or analog PBX, as well as Key Systems to an IP-Network. www.positrontelecom.com
