
Positron Telecommunication Systems Inc. Announces European Distribution Agreement with Mapleleaf Technologies

MONTREAL, June 11, 2009 - Positron Telecommunication Systems, a leader in sophisticated VoIP equipment for enterprise communication, announces their distribution agreement with Mapleleaf Technologies of Germany, a pan-European Distributor of premier Asterisk/VoIP, Ethernet/IP, and Serial-to-Ethernet/IP products and technologies.

"This is the first European distribution agreement for Positron Telecom," explains Richard McGravie, President of Positron Telecom. "It provides the European region with direct access to a wide range of premier products in the Asterisk/VoIP market such as the PBX PCI Adapter."

The Asterisk/VoIP market is rapidly growing and further increasing the demand for simplified, easy-to-install solutions. This trend is driven by companies who are required to lower their costs while increasing the functionality of their voice systems. Many of today's telephony solutions were architected over five years ago and struggle to blend within the IP world. Positron Telecom breaks down that barrier. Traditional telephony PBX boards only provide the telephony interface, which have complicated drivers that can have operating system issues and require a complex installation process that is prone to fail. The Positron Telecom solution integrates the PBX, incorporates telephony and IP ports and installs as an Ethernet adapter, which makes it operating system independent thus requiring no additional drivers.

The distribution of Positron Telecom's products by Mapleleaf Technologies allows European companies to achieve this telephony transformation by benefiting from the latest and most valuable products in the Asterisk/VoIP market.

"It is my pleasure to announce that Mapleleaf Technologies will now offer our products for distribution," said McGravie. "Mapleleaf is known for their strength and experience in distribution for the Asterisk/VoIP market. This partnership offers strong support for businesses in this region."

About Maple Leaf Technologies

MapleLeaf Technologies provides a wide range of premier products and technologies from manufacturers such as 3CX, Alphatech Engineering, beroNet, Bicom Systems, Digium, Eurotech Communication, Gerdes, IndustryDynamics, Multenet Technologies, OpenVox Communication, Patton Electronics, Pika Technologies, Positron Telecom, Redfone Communications, Rhino Equipment, Sangoma Technologies, Sirrix, Sixnet, Syswan Technologies, VoiSmart, & Xorcom.

About Positron Telecommunication Systems Inc.

Originally formed in January 2008, Positron Telecommunications Systems Inc. develops and markets sophisticated VoIP equipment for enterprise communication and collaboration through communication service providers. The company's products integrate VoIP and traditional telephony in stand-alone systems that combine ease of use with powerful functionality. Its VoIP devices connect analog devices (telephone, fax and modem) to an IP-Network and gateways connect PSTN users to an IP Network or analog PBX, as well as Key Systems to an IP-Network. Positron and the Positron logo are registered trademarks of Positron Inc.
